Dennis Faulk

I am writing to you to strongly urge THE E.P.A. TO ADOPT MEASURES TO IMPLEMENT THE D.O.E.'S PREFERRED ALTERNATIVE (#3) TO PRESERVE THE B-REACTOR for public use.

My father worked on this reactor from the very first day of construction, and I helped to stabilize and clean up the fuel storage basin in the mid 1980's.

I am a member of the B-Reactor Museum Association for this reason.

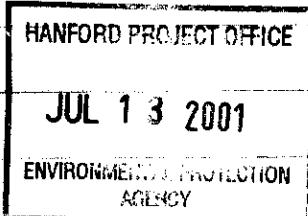

Sincerely

Bob Massie
